

A modern interior design scene featuring a large, light-colored sectional sofa in the foreground, a round coffee table, and several armchairs. The background shows a well-lit room with large windows and contemporary decor. The entire image is overlaid with a semi-transparent red filter.

interi **YOUR** DESIGN

THE SOLUTION TO YOUR SPACE

INTRODUCTION

Interested in interior design but don't have the means? Want to redecorate your home but don't have the money to hire a designer? Or maybe you don't think you can do it yourself? Well, with our **interiYOURdesign App**, become your own interior designer. You can save time and money!

Experience our easy-to-understand walk-through navigation. Using our augmented reality technology, you can capture and render your space. Redecorate right before your eyes! Either look at different styles for your living room while standing in it. Or save it to your library and play with it later! You can choose your own furniture, order it on the spot and have it delivered to your home!

All within the **interiYOURdesign App**.

It can be used as a shop or just having fun redecorating. Explore our suggested styles. Build your own profile, and we'll suggest items based on your tastes. Buying a new home? Pick out all the furniture and see it in your home before spending any money!

USER INTERVIEWS & SURVEYS

EXECUTIVE SUMMARY

Our user interviews and surveys were very helpful in figuring out what our potential audience would want. We've learned that most people believe that the look and feel of their home or space is important. They take an interest in design and would like to

redecorate, but they don't have the time or money to do it. 80% of people have redecorated their homes within the past 5-10 years, and 40% of those people have redecorated in the past 1-2 years. Almost no one has hired an interior designer in the past, but half the people said they would benefit from it. That leaves a perfect spot for us in the market. Very few people have used augmented reality before but are excited and intrigued by the idea.

We've also found that 80% of people own their home and plan on staying there for the next 5-10 years. The size is average to smaller than average, which speaks to them possibly wanting to save money on redecorating by using our app.

Based on all this feedback, we are confident that we have designed a user-friendly app that a large number of people could potentially be interested in.

USER INTERVIEWS

SUSAN

25 years old

1. **What is your occupation?**
Research Assistant
2. **What kind of home/office decor style do you prefer?**
Modern style with cold colour combinations
3. **What are some obstacles that prevent you from designing your home or office?**
 - Budget
 - Lack of time
4. **If there was an interior design app for your smartphone, what 5 features would you like to see?**
 - Teach me about the effect of colours on mood
 - Recommended colour combination
 - Recommended decorations based on photos taken
 - Ability to make online purchases from furniture stores
 - Ability to design for different tastes
5. **Does the idea of augmented/virtual reality for interior design interest you? Why or why not?**
It interests me as much as any other type of virtual reality does

USER INTERVIEWS

THOMAS

34 years old

1. **What is your occupation?**
Architect
2. **What kind of home/office decor style do you prefer?**
Modern
3. **What are some obstacles that prevent you from designing your home or office?**
 - Budget
 - Lack of time
 - Old furniture
4. **If there was an interior design app for your smartphone, what 5 features would you like to see?**
 - User-friendly
 - Design variety
 - Colour option
 - Link to related websites
 - Ability of design combination
5. **Does the idea of augmented/virtual reality for interior design interest you? Why or why not?**
Yes, it gives me some idea about home decoration, which gives me a good feeling about my occupation

USER INTERVIEWS

ALANA

53 years old

1. **What is your occupation?**
Interior decorator/designer
2. **What kind of home/office decor style do you prefer?**
Modern contemporary
3. **What are some obstacles that prevent you from designing your home or office?**
- Money
4. **If there was an interior design app for your smartphone, what 5 features would you like to see?**
 - Change wall colour
 - See items through phone
 - Easily add/remove items
 - Able to change space plan
 - Prepackaged themes and styles
5. **Does the idea of augmented/virtual reality for interior design interest you? Why or why not?**
No! It's in direct competition with my business. As an interior designer, it could be a very helpful tool to me.

USER INTERVIEWS

STEVE

32 years old

1. **What is your occupation?**
Metal fabrication
2. **What kind of home/office decor style do you prefer?**
New look that is clean and crisp
3. **What are some obstacles that prevent you from designing your home or office?**
 - Not knowing how to do it
 - Too busy
4. **If there was an interior design app for your smartphone, what 5 features would you like to see?**
 - Suggestions based on my taste
 - Ability to flip through various products and options
 - Easy to use
 - Pricing search options (like Craigslist)
5. **Does the idea of augmented/virtual reality for interior design interest you? Why or why not?**
Yes! Sounds very cool

USER INTERVIEWS

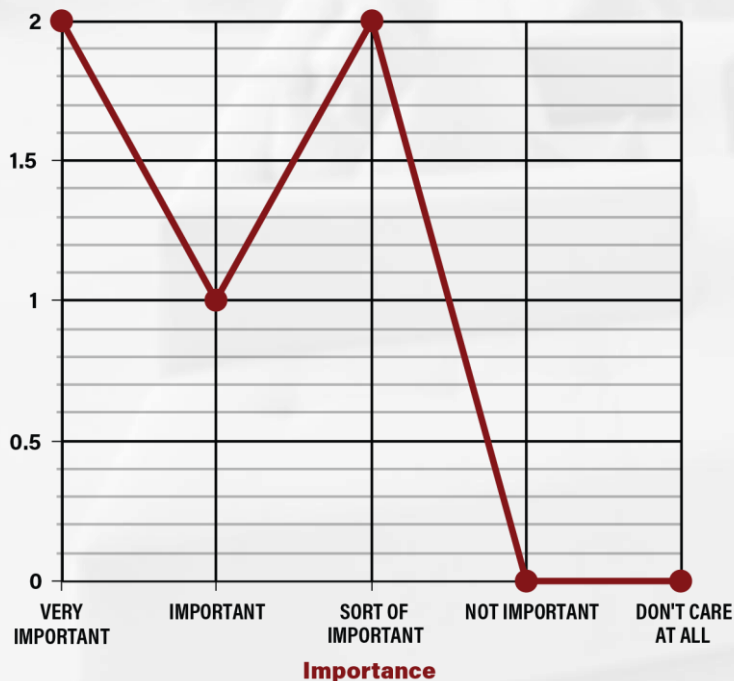

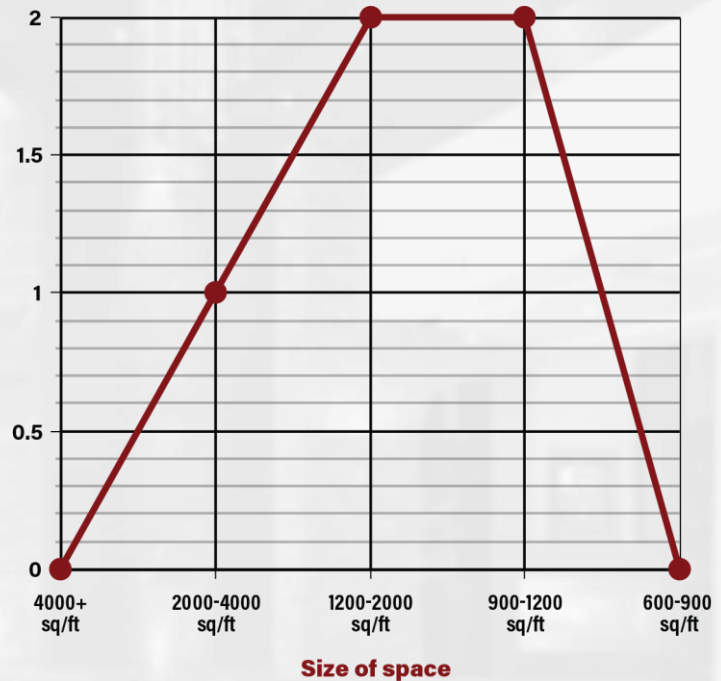

LEAH

42 years old

1. **What is your occupation?**
Graphic designer
2. **What kind of home/office decor style do you prefer?**
Eclectic, vintage-type vibe with some modern twists
3. **What are some obstacles that prevent you from designing your home or office?**
 - Money
 - Time
4. **If there was an interior design app for your smartphone, what 5 features would you like to see?**
 - Variety of styles
 - Colour options (based on themes)
 - Directions/links to purchase items
 - Pricing options
 - Ability to move current furniture around
5. **Does the idea of augmented/virtual reality for interior design interest you? Why or why not?**
Yes! I like playing on my phone, so it might be productive use of spare time

SURVEYS

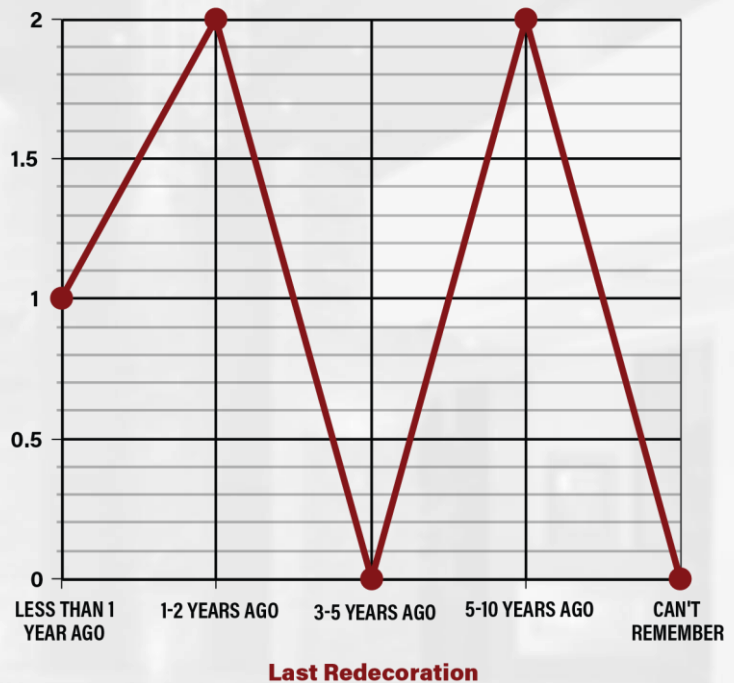

How big is your living space?

How important is the look and feel of your living/working environment to you?

SURVEYS

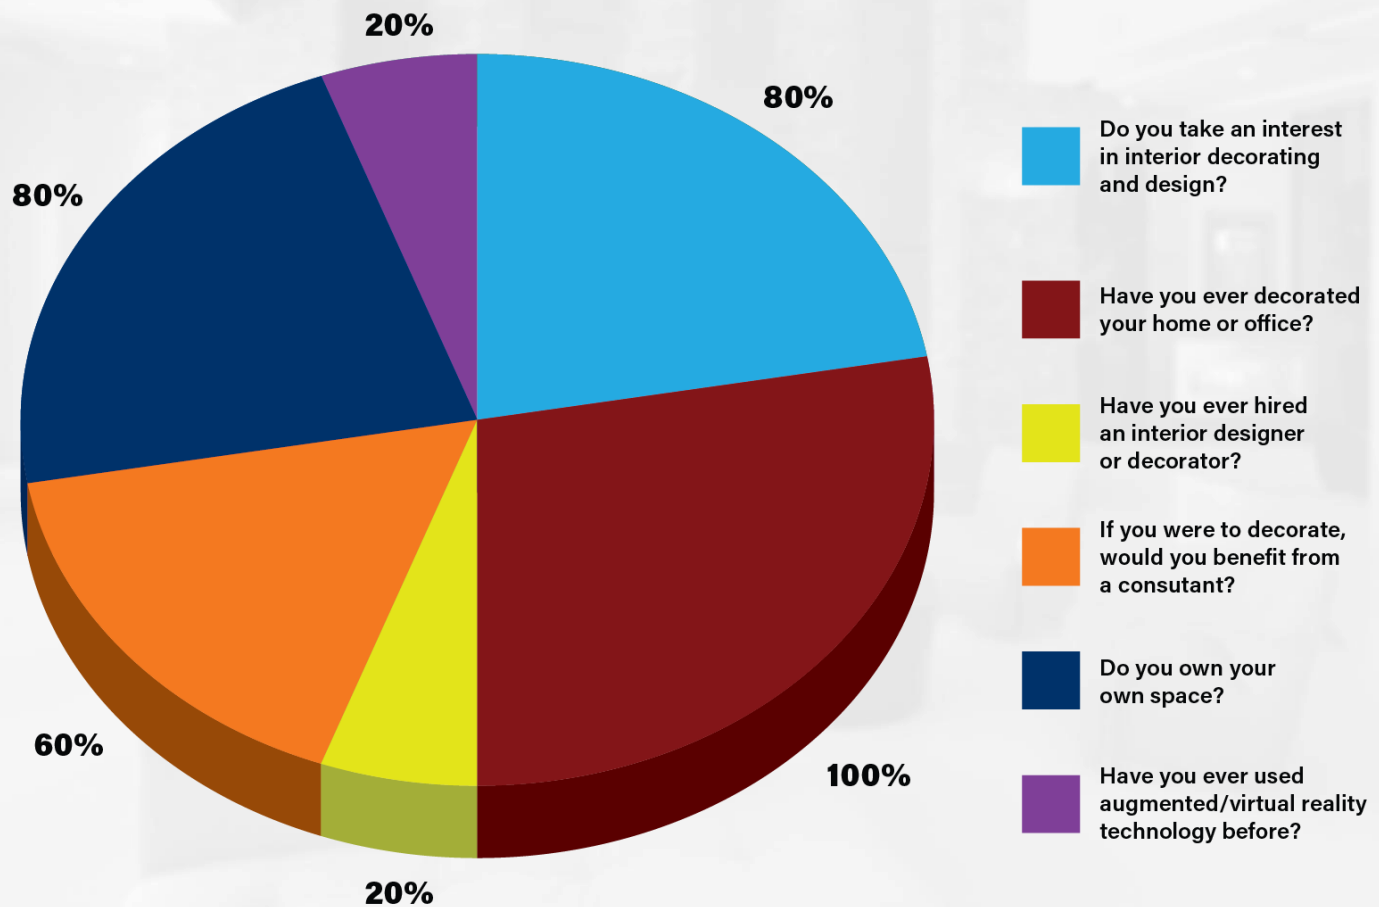

When was the last time you redecorated your office or home?

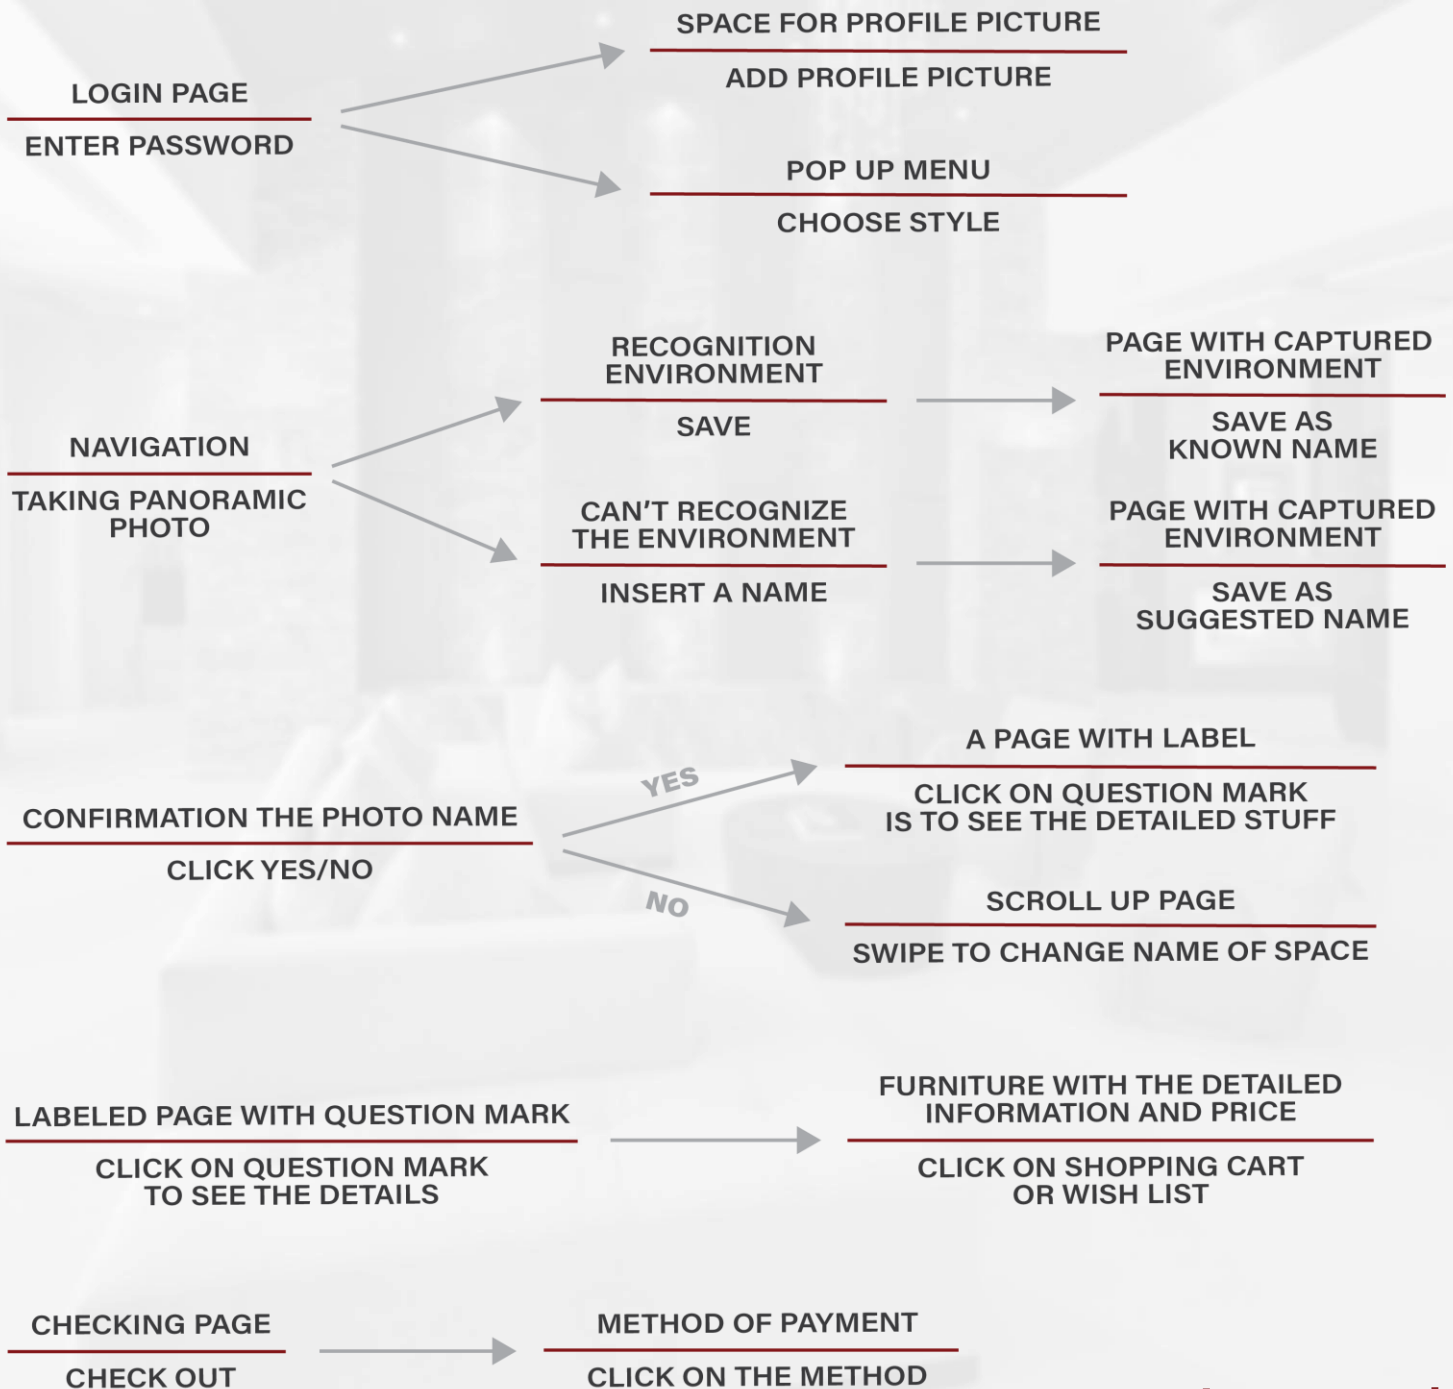

How long are you planning to remain in your current home?

SURVEYS

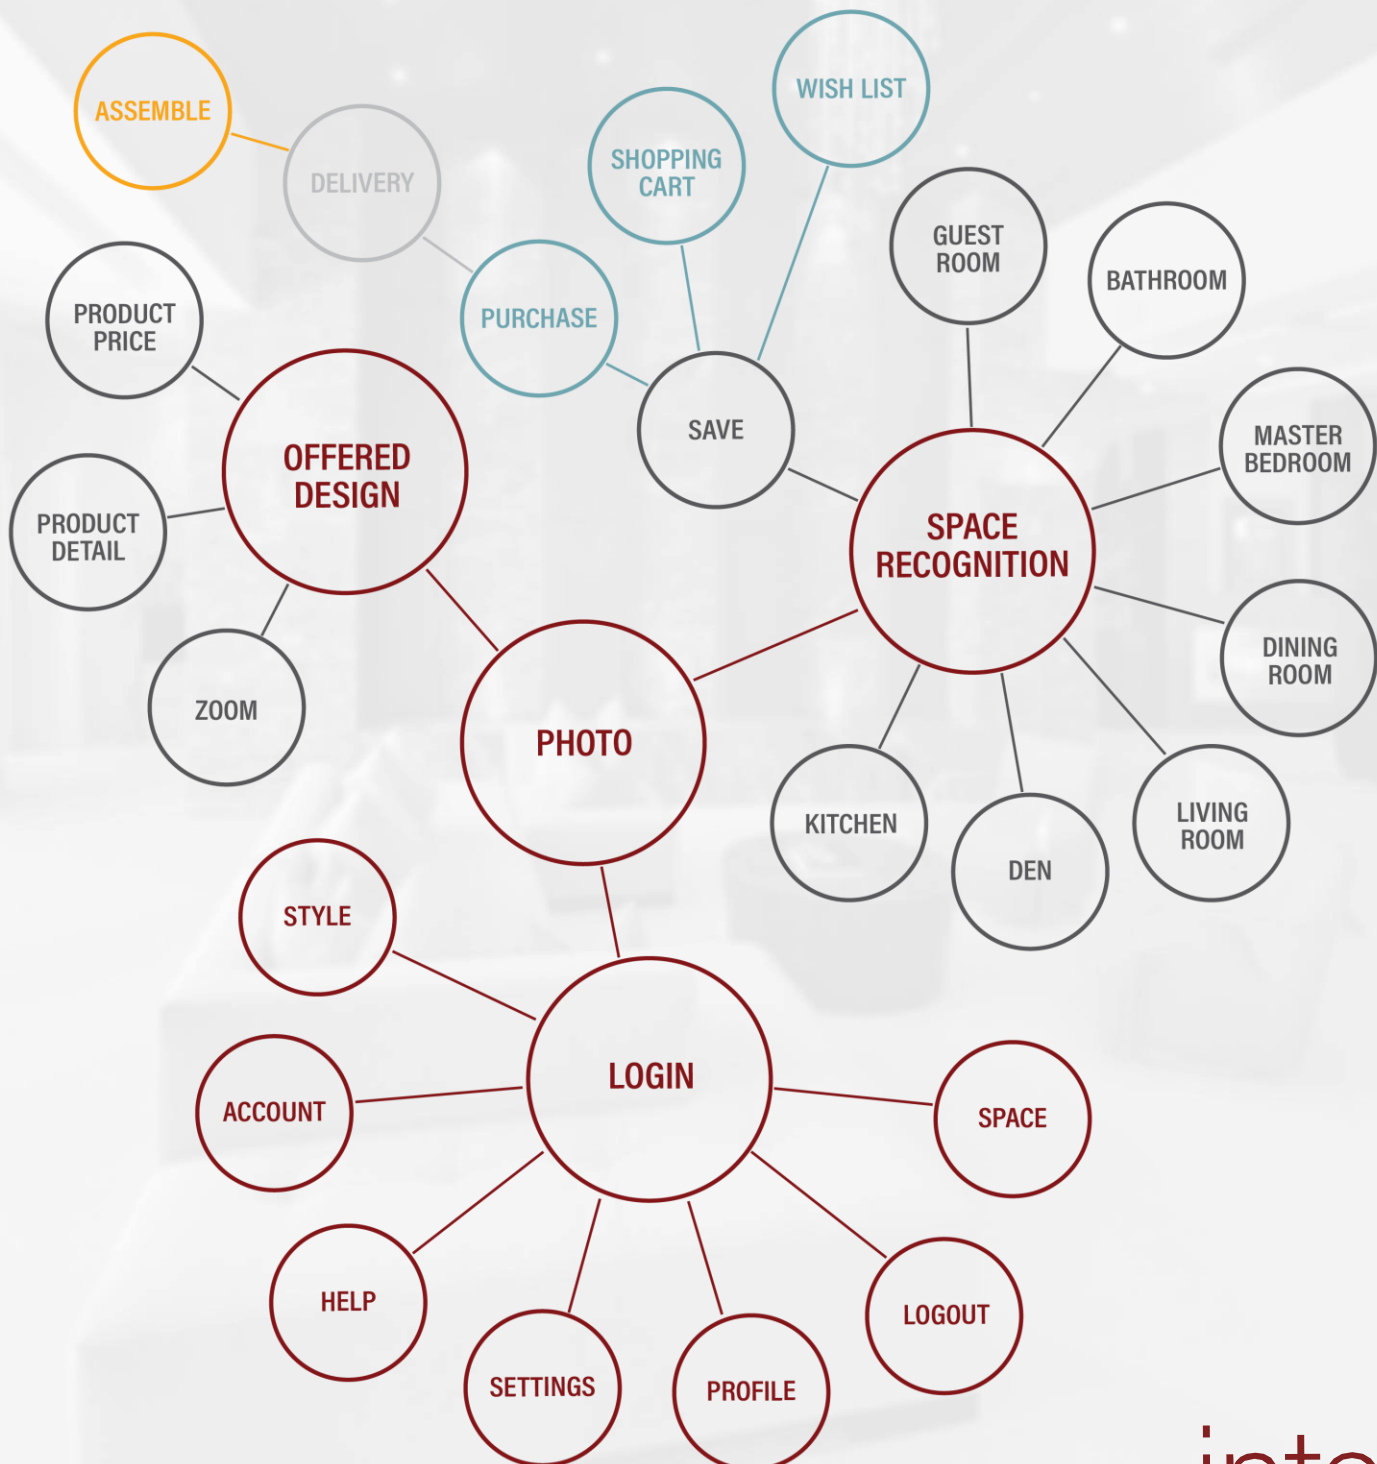

Here is a pie graph showing how many people answered 'Yes' to the following questions:

USER FLOWS

MIND MAP

PERSONAS

PROFILE

Name: Harold Hammington

Age: 45

Relationship Status: Married

Children: 3

Profession: Office Manager at tech company

Residence: House in Maple Ridge

Pets: 0

Ethnicity: Asian

Languages: English and Mandarin

CHARACTERISTICS

- Enjoys golf, exercise
- Comfortable with technology
- Has laptop and 2 smartphones
- Uses social media for personal and work
- Drives own high-end-ish car
- Homeowner
- Clean and tidy

PAIN POINTS

- Fussy about the look of his environment
- Needs storage within space
- Requires many things in his environment while wanting it to remain uncluttered
- Demands to get his money's worth

NEEDS

- He needs his tech to be designed properly
- Wants his technology to be user-friendly, easy to operate, with good customer service
- Doesn't want to feel limited, needs to have many options/offers
- To feel classy/high end

DAY IN THE LIFE

WORKDAY

- 8:00 AM:** Gets into the office
- 8:30 AM:** Checks email, checks staff, gives everyone tasks for the day/morning
- 9:30 AM:** Has a short meeting
- 10:00 AM:** Has coffee and a scone, reads the news
- 10:30 AM:** Works
- 12:00 PM:** Goes to lunch meeting
- 1:00 PM:** Catches up with email. Makes phone calls.
- 1:45 PM:** Opens interiYOUR Design App. Continues playing around with design for his office.
- 3:00 PM:** Begins taking individual daily report meetings with staff
- 4:00 PM:** Drives home

**HAROLD
HAMMINGTON**

PERSONAS

PROFILE

Name: Teresa Tammington

Age: 28

Relationship Status: Single

Children: 0

Profession: Architect

Residence: Apartment in Vancouver

Pets: 1 dog

Ethnicity: Caucasian

Languages: English

CHARACTERISTICS

- Workaholic, busy life
- Travels for work regularly
- Hobbies outside of work are mainly relaxing and socializing
- Comfortable with technology
- Has laptop and 2 smartphones
- Uses social media for personal
- Own high-end-ish apartment downtown
- Likes shopping and having nice new things

PAIN POINTS

- Very particular about the look of her environment
- Demands to get her money's worth
- Very busy life. Doesn't want extra tasks outside of work
- Not always reachable/available because she's busy with work

NEEDS

- Wants to live in a cozy, modern environment.
- Likes things to look and feel clean and new
- Living space isn't huge, so she needs to get the most out of her space (ie. utilizing wardrobes etc)
- Wants his technology to be user-friendly, easy to operate, with good customer service

DAY IN THE LIFE

AFTER WORK

- 5:00 PM:** Gets home from work, turns on TV, has shower, gets comfortable
- 6:30 PM:** Pours wine. Starts preparing dinner while she watches "The Bachelor"
- 7:00 PM:** Sits on couch with dinner, watches TV
- 7:30 PM:** Continues half watching TV while fiddling on smart phone (texting with friends, checking social media, etc.)
- 8:30 PM:** Opens interiYOUR Design App. Continues playing around with apartment design. Casually, cycles through different wall colours, art for walls. Saving things to wish list.
- 9:30 PM:** Continues relaxing, watching TV, chatting, checking work emails for the next day, re-opening interiYOUR Design App throughout the night
- 10:30 PM:** Goes to bed

**TERESA
TAMMINGTON**

PERSONAS

PROFILE

Name: Simon Simmington

Age: 48

Relationship Status: Single

Children: 0

Profession: Network administrator

Residence: Rancher in North Vancouver

Pets: 0

Ethnicity: Portuguese

Languages: English and Portuguese

CHARACTERISTICS

- Enjoy travelling to new countries
- Comfortable with technology
- Sometimes must work or troubleshoot from home
- Own a nice home
- Like modern, stylish places
- He spends it easily to get the best

PAIN POINTS

- He always wants unique environments
- He is picky about the features of his home
- Too tidy and he is not flexible with new suggestion. He is bossy and needs exactly what he mentioned.

NEEDS

- Wants a big office in his home for his network based on his job
- The style of his home is important, doesn't matter how much it costs
- Because of his job (network security), the privacy of his office is so important for him

DAY IN THE LIFE

AFTER DAY

- 5:00 PM:** Gets home from work
- 6:00 PM:** Reads some online news while drinking coffee
- 6:30 PM:** Checks his work emails and does his paperwork.
- 7:30 PM:** Starts preparing dinner while listening to an audiobook
- 8:00 PM:** While eating dinner, he opens interiYOUR Design app, plays around with redecoration ideas for living room and patio
- 9:30 PM:** Winds down on couch. Watches Dr. Who.
- 11:00 PM:** Goes to bed. Watching news. Continues playing on the app. Adds new end tables to wish list.
- 12:00 AM:** Goes to sleep.

**SIMON
SIMMINGTON**

PERSONAS

PROFILE

Name: Ashley Ashlington

Age: 40 years old

Relationship Status: Married

Children: 2

Profession: Mom and part-time student

Residence: House in Burnaby

Pets: 1 cat

Ethnicity: European

Languages: English and French

CHARACTERISTICS

- A busy mom with 2 children
- Enjoy having parties and picnics as well
- Has 2 laptops, a desktop, 2 iPads, and 2 smartphones
- Teaches her children every day
- Homeowner
- Loves reading books
- Very fast and organized

PAIN POINTS

- Can be annoyed with an untidy environment
- Doesn't like her old home
- Doesn't spend easily
- Is too busy to figure out confusing apps
- Doesn't want attention taken from kids unless there's a good reason

NEEDS

- She needs her home designed stylishly with colourful furniture
- Needs her own quiet place for studying
- Needs big and bright spaces
- She needs lots of space for storing and organizing

DAY IN THE LIFE

FULL DAY

ITERATION #1

ITERATION #1 FEEDBACK

WHAT IS BEING TESTED

Capturing a photo of your space

GOALS OF TEST

Capture and render your environment

SCRIPT STEPS: INTRODUCTION

We want a user to be able to be their own interior designer by capturing a photo of their environment using their smartphone

QUESTIONS

1. Did the steps leading to you taking a photo make sense?
2. Was there logical progression using the app that led you to taking a photo and rendering your environment?
3. Are there any unnecessary steps?
4. Is there anything we should add?

RESULTS

1. Yes
2. Yes
3. No, but we missed some steps
4. Yes, user flow for taking a photo (snapping pic), environment recognition (if incorrect, a pop-up comes up with suggested environments)

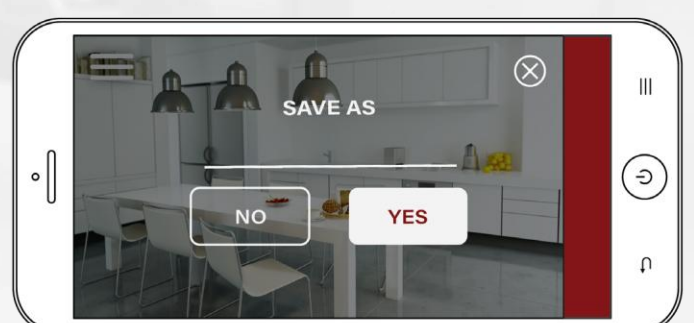

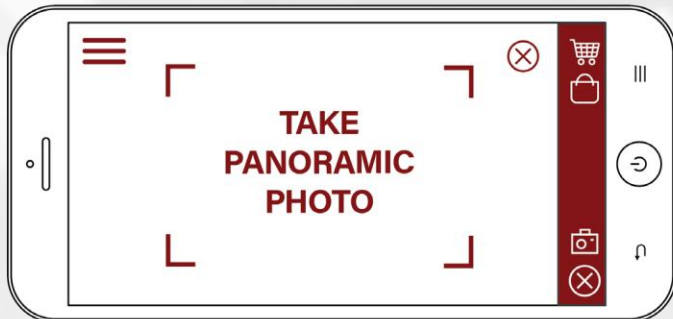

CONCLUSION

We've realized that we missed a few steps and actions along the way. Here are the things we're going to update

- Add a step between saving the photo as a certain category. If the app guess your environment wrong, you have the option to select the correct option
- Organize the Take Photo icons in a more familiar way
- Change the location of the exit icon

ITERATION #2

ITERATION #2 FEEDBACK

WHAT IS BEING TESTED

Capturing a photo of your space

GOALS OF TEST

Capture and render your environment

SCRIPT STEPS: INTRODUCTION

We want a user to be able to be their own interior designer by capturing a photo of their environment using their smartphone

QUESTIONS

1. Did the steps leading to you taking a photo make sense?
2. Was there logical progression using the app that led you to taking a photo and rendering your environment?
3. Are there any unnecessary steps?
4. Is there anything we should add?

RESULTS

1. Yes
2. Yes
3. Yes, there are still too many steps in the saving process.
4. Yes, add a save icon, use a better icon for the wish list and add a clearer photo snapping button

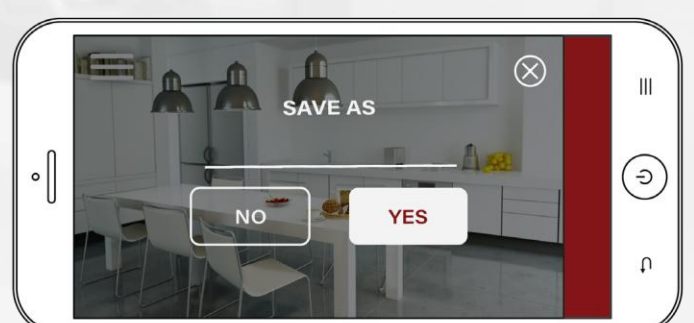

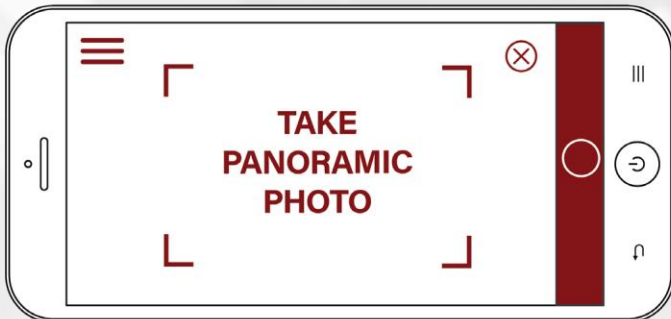

CONCLUSION

We've realized that we missed a few steps and actions along the way. Here are the things we're going to update

- There are still too many steps in our saving process, and our icons are still a little confusing.
- We are going to reorganize the saving and rendering process into something more scientific and user-friendly

WHAT IS BEING TESTED

Capturing a photo of your space

GOALS OF TEST

Capture and render your environment

SCRIPT STEPS: INTRODUCTION

We want a user to be able to be their own interior designer by capturing a photo of their environment using their smartphone

QUESTIONS

1. Did the steps leading to you taking a photo make sense?
2. Was there logical progression using the app that led you to taking a photo and rendering your environment?
3. Are there any unnecessary steps?
4. Is there anything we should add?

RESULTS

1. Yes
2. Yes
3. Yes, the saving process had too many confusing steps. We got great advice to change it
4. Yes, the ability to toggle between saved spaces by clicking the name of the current space you are in

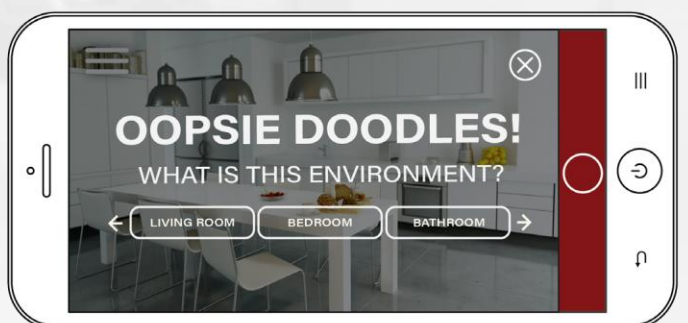

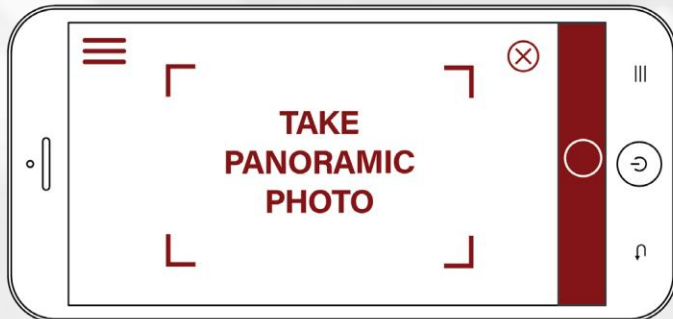

CONCLUSION

We've realized that we missed a few steps and actions along the way. Here are the things we're going to update

- When you take a panoramic photo of your space, the app renders and tries to recognize it. If it's incorrect you can choose from different options. Once you have selected the correct space, a save icon comes up.
